Model DPC2100™ Cable Modem

Description

The DPC2100™ Cable Modem (DPC2100) provides DOCSIS® broadband network operators with a cost-effective solution for delivering standards-based, high-speed data services to their subscribers.

The DPC2100 is designed to meet DOCSIS 2.0 specifications as well as offering backward compatibility for operation in DOCSIS 1.1 and DOCSIS 1.0 networks.

The DPC2100 features WebWizard, a browser-based user interface. WebWizard is a powerful tool that facilitates installation and troubleshooting. WebWizard eliminates the need to load set-up software on the customer premises equipment (CPE). The DPC2100 also features five front-panel LED status indicators that provide visual feedback of real-time data transmission and operational status.

 Cable Modem

Cable Modem Access Protection

The DPC2100 features Cable Modem Access Protection. When enabled, this feature blocks network side access to the CPE. This software-based "standby switch" provides the user with the ability to disable the Ethernet and USB data communications when their computers are not in use, which reduces the risk of unauthorized "hacking" into the CPE. This quick and simple "off" mechanism is used instead of physically disconnecting cables.
